# A BOLD STEP TOWARDS SUSTAINABILITY

**At Go Travel, we're proud to embrace eco-friendly practices and materials in our products.**

Our commitment to reducing environmental impact is reflected in the use of **GRS-certified rPET** fabrics across a broad product range, including updated lightweight travel bags and travel pillow covers.

**We're not stopping there!**

Innovation is at the heart of our sustainability journey. We have introduced the use of recycled PVC (**rPVC**) for luggage tags — a step towards repurposing materials that might otherwise end up in landfills or be incinerated.

In addition, all new product packaging will be **FSC-certified**, guaranteeing it originates from responsibly managed forests, supporting sustainable forestry practices.

**It's all about the journey.**

**It's all about the environment.**

# ENVIRONMENT, SOCIAL AND GOVERNANCE POLICY

## Environment

**We are introducing the use of GRS certified rPET fabrics & rPVC materials into our range.  
We are continuing to redesign all of our packaging to ensure it can be fully recycled.**

We're reducing our single use plastic by 85% throughout our product packaging range.  
All product packaging is FSC certified card.

## Social

**We have an Ethical Code of Conduct, which applies to the supplier, manufacturer and any other individuals involved in supplying products to our company.**

Our Compliance Team visits our main suppliers and factories regularly to maintain and grow these relationships.  
We support and encourage a diverse workforce throughout it's entire operation and supply chain.

## Governance

**All suppliers are, either, a member of Sedex or BSCI, Social Accountability Platforms and are annually audited to these standards.**

# WHAT IS FSC?

**The FSC (Forest Stewardship Council®)**  
is an organisation that promotes responsible management of the world's forests.

FSC certification helps consumers identify products made from responsibly sourced wood or paper, supporting sustainable forest practices and reducing deforestation.

It protects  
animal habitats

Maintains  
biodiversity

Protects old  
growth trees

## Chain of Custody Certification:

This ensures that FSC-certified materials are tracked through the supply chain, from forest to final product, allowing companies to label products as FSC-certified.

## FSC Labels:

Products bearing the FSC label are verified as coming from responsibly managed forests.

**There are three main types of labels:**

1

### FSC 100%

All wood or fiber comes  
from FSC-certified forests.

2

### FSC Recycled

Products are made from  
100% recycled material.

3

### FSC Mix

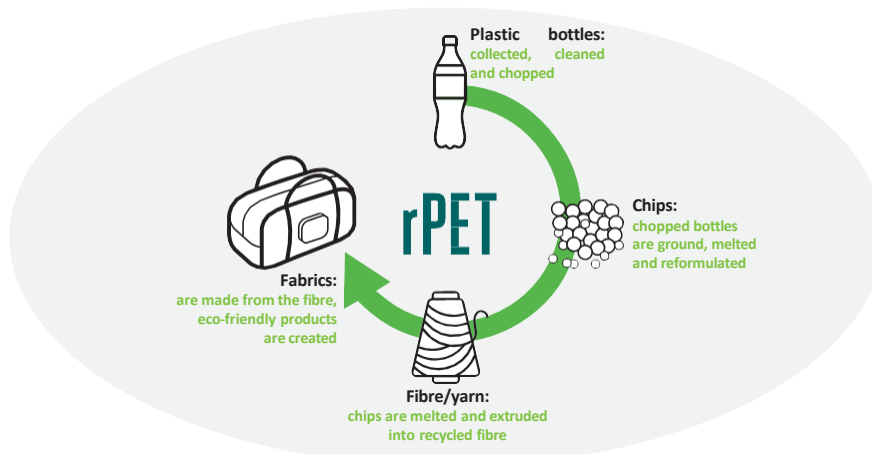

Products are made from a  
combination of FSC-certified,  
recycled, or controlled wood.

**Our new Packaging is FSC certified.**

# WHAT IS rPET?

**rPET stands for Recycled Polyethylene Terephthalate, which is a material made from recycled PET plastics.**

PET (Polyethylene Terephthalate) is a common plastic used in a variety of products, such as water bottles, food containers, and textiles. When these PET products are collected and processed for recycling, the resulting material is called rPET.

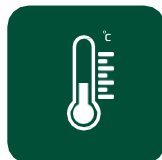

## Environmental Benefits:

rPET has a lower carbon footprint. Producing rPET uses less energy and water compared to producing virgin PET from raw materials. By recycling PET into rPET it helps reduce plastic waste in landfills and oceans.

Less Greenhouse  
Emissions

Less  
Energy

Lower Carbon  
Footprint

# WHAT IS rPVC?

**rPVC stands for Recycled Polyvinyl Chloride, a material made from recycled PVC (Polyvinyl Chloride) plastic.**

It is made by recycling old or discarded PVC products.

These materials are collected, sorted, cleaned, and processed to create recycled plastic that can be reused in manufacturing. Recycled PVC plastic (rPVC) has the same durability as the PVC product.

## Environmental Benefits:

Recycling PVC into rPVC helps keep plastic out of landfills and reduces plastic pollution, making it the sustainable choice. rPVC consumes less energy compared to manufacturing new PVC from raw materials.

By using recycled materials it conserves natural resources, like oil and gas, which are needed to produce virgin plastics.

Reduces  
waste

Less  
Energy

Conserves  
natural resources

**OUR JOURNEY  
CONTINUES...**

Custom fit ear plugs with 4 size adjusting filters. *Safety tested to EN 352-2.*

430.101

# HOW COMPRESSION SOCKS HELP DVT

Inactivity during a long journey slows down blood flow, allowing clots to form. This is commonly known as DVT (Deep Vein Thrombosis). Graduated compression socks apply pressure to the lower leg to improve blood circulation and are clinically proven to help prevent DVT, while also reducing any discomfort and swelling.

## FLIGHT SOCKS

Medically researched graduated compression flight socks. *Safety tested to BS 661210.*

WHAT IS A

# TSA LOCK?

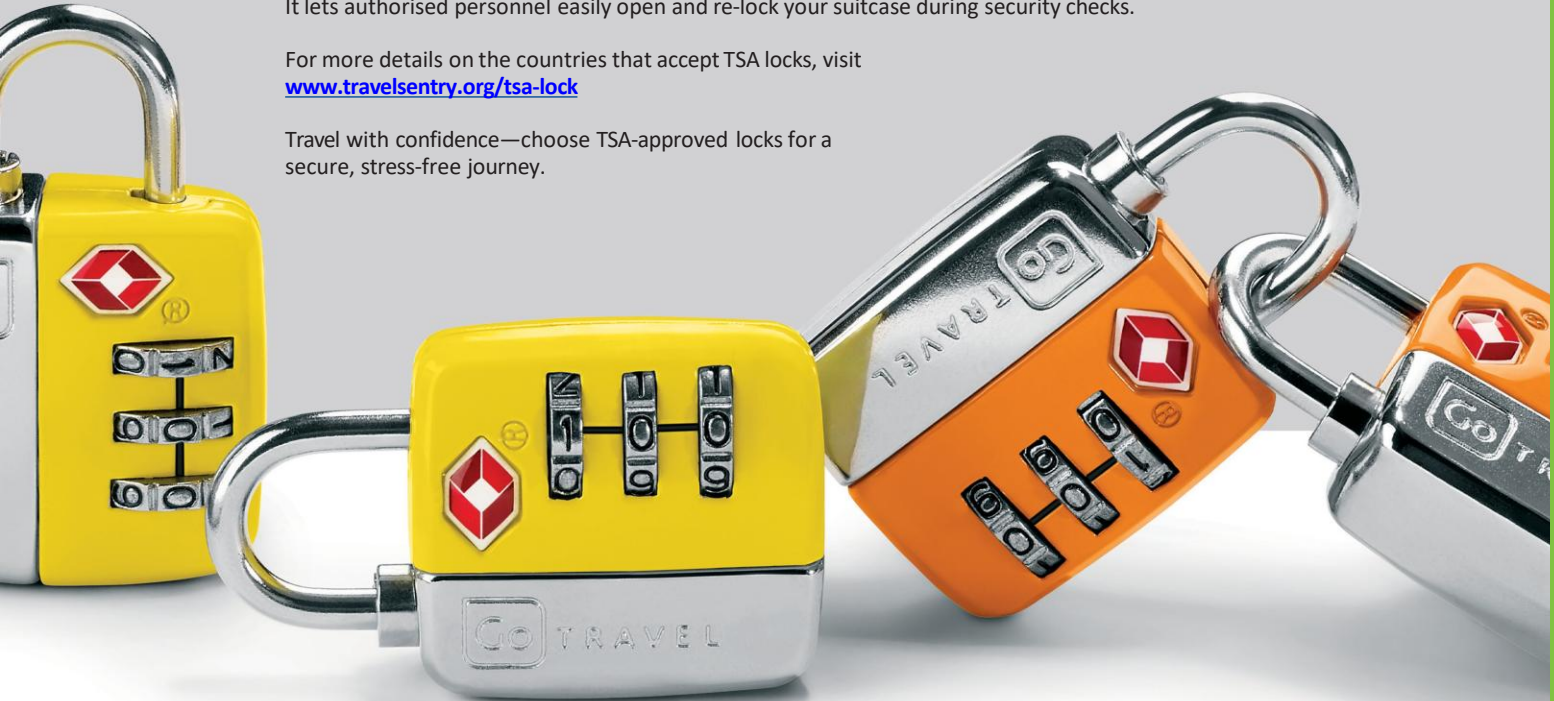

Travel Sentry locks set the standard for security, enabling authorised agencies to open, inspect, and relock your luggage without causing damage. **TSA-approved locks** are recognised by security agencies in **over 40 countries** across Asia & the Pacific, the Americas, Europe, and the Middle East & Africa.

The **red diamond logo** indicates the lock is **TSA-approved**.

It lets authorised personnel easily open and re-lock your suitcase during security checks.

For more details on the countries that accept TSA locks, visit  
[www.travelsentry.org/tsa-lock](http://www.travelsentry.org/tsa-lock)

Travel with confidence—choose TSA-approved locks for a secure, stress-free journey.

604.101

# RFID

## CONTACTLESS IS GREAT, BUT...

Radio Frequency Identification (RFID) technology is rapidly spreading. From bank cards to passports, these micro chips certainly make life easier for everyone. However, card security is a major concern especially their vulnerability to digital pickpockets.

The RFID range shields all your contactless cards and protects the sensitive data stored on these chips.

Clips firmly to clothing.  
No pocket required

Detachable clip doubles  
up as a money clip

### THE CLIP POUCH (RFID)

# MISCELLANEOUS

# POINT OF SALE

# OUR PLANOGRAM SYSTEM

## What we offer

- Customisable product placement on **our fixtures or your wall space**.
- **Internal planogram** guidance to optimise product placement, improving sales results.

## Tailored to your store's needs

Considerations include:

- **Store location:** Adapting the range for specific environments, e.g., airport location, train station, or pharmacy.
- **Right products, right places:** Ensuring relevant products are prioritised for each location.

## Optimised for replenishment & sales

- **Best sellers:** Ensuring adequate facings for high-demand items.
- **Efficient restocking:** helping keep shelves stocked and products visible for customers.

# CREATIVE SUPPORT

From striking window posters to compelling videos, our talented in-house graphic design team is always ready to deliver branded visuals and animations that inspire consumers and boost sales.

# MADE TO MEASURE

We're excited to collaborate with you on crafting a bespoke retail project tailored to your store's unique needs. Whether you're looking to maximise an unconventional space or transform an awkward column, our skilled and dedicated team is here to deliver the perfect solution.
